## cardiac surgeries & procedures

Oct 31, 2017 (performance year 2016)

Kaiser Permanente is widely known as a leader in preventing and managing heart disease.

But if prevention efforts somehow fail, be assured: Kaiser Permanente physicians and facilities also earn top honors when it comes to cardiac specialty care.

For example, in California, we do more state-of-the-art cardiac surgeries and procedures than noted institutions such as Stanford and Cedars-Sinai — and that matters, because the more surgeries you do, the better you become.

If you need heart care, you can rely on us — we performed more than 36,000 surgeries and procedures in 2016\*.

\*According to the 2017 HEDIS, or Healthcare Effectiveness Data and Information Set, which is used by more than 90 percent of America's health plans to measure performance on care and service.
