

968,653
people

served by Medicaid + CHIP

Kaiser Permanente provided nearly a million people with health care through Medicaid and the Children's Health Insurance Program in 2017.

Both programs provide publicly financed health care to low-income Americans. As a nonprofit organization dedicated to the health of all people, especially those with limited means, we're proud to provide this essential coverage.

Nothing is more important than your health and finding affordable health care options for you and your family.
