get care from Kaiser Permanente

We currently serve more than 12 million members in 8 states and the District of Columbia. It's easy to see why so many people turn to us for health and health care.

Our members receive seamless health care featuring the latest techniques and technologies. Our system of team-based care ensures that members get the right care, at the right time, in the right place.

And we can often provide complete care under one roof. No need to run to the drugstore to fill a prescription, or drive across town for lab work — at Kaiser Permanente, it all happens in the same place.
