

# 58,345 NURSES

help our patients  
navigate their care

**More than 58,000 nurses are at the heart of care delivery at Kaiser Permanente — they are essential to our mission of delivering high-quality care.**

Their leadership, expertise and compassion help us deliver world-class care in operating rooms, ambulatory care centers, emergency rooms, home settings, clinics and more.

The nurses of Kaiser Permanente go above and beyond while providing high-quality care to our patients. Nothing highlights this statement more than the story of Kathy — watch as a nurse navigator, Rhonda, provides her with support throughout her cancer-care journey.
